

Do You Want To Change The World?

- Do you work with web, graphics and usability?
- Can you code for the web? (and maybe more?)
- Can you make complicated stuff easy and elegant?
- Do you want to play a key role in a start-up with an ambition to solve an important problem for millions of people?

Then maybe you're the webdesigner Kaplak is looking for?

Kaplak's mission is to help niche producers make their products visible and reach their online markets. We aspire to create easily accessible tools, which expands the online reach of our customers and allows anyone to sell a "slim" product without paying big bucks for it.

Your most important task will be to translate Kaplak's vision and mission to easily understood webbased communication.

Qualifications

You're technically skilled. You know how to handle a mouse and an image processor, and how to get it online. You know your ways around HTML, PHP, MySQL and CSS. You have excellent communications skills and fingerspitzengefühl for userfriendly design. You speak and write a fluent English.

You are curious to learn more about new technology and about the opportunities and architectures of the internet. You have sufficient backbone to say "I don't understand", when you don't get it, and you are a self-targeting missile to seeking, demanding, finding and sharing information, when something is off. You are willing to unfold yourself online and create visibility about you and your work. You can and are willing to participate fully in Kaplak's information sharing environment and share every required detail, internally as well as publically, in writing, speech, images and video.

You are familiar with technologies and concepts such as p2p, bittorrent, wiki, copyright, open source, affiliate marketing and peer production, and you know and use services such as Creative Commons, YouTube, Twitter, del.icio.us, Digg and Wikipedia among others.

You want to work in a young start-up with growth ambitions, and can live with being paid in b-shares at first, and earn more with time and results. You have ambition and consider your time at Kaplak a springboard to more.

Interested?
